Martifer Solar

Martifer Solar is a Portuguese company with a presence in more than 20 countries over 4 continents that has implemented 670 MW of solar energy projects worldwide. Hamilton Deed have previously worked with Martifer Solar on various projects across the UK and are currently supporting the local offices in the UK, Jordan and Sardinia with their current projects.

Requirement – Hamilton Deed worked with Martifer across a number of global locations to provide full time on-site QHSE advisors, PPE, site signage and supplies, electrical audit and inspection (G59) and UXO surveys

The construction projects were to be completed by a multi national workforce that would not be cognisant of UK health and safety regulations. The tight timescales for project completion would require strict adherence to safety standards to ensure no time was lost.

The scope of services offered include:

- CDM-C support
- Attendance at daily site briefings
- Review of construction phase health and safety plans
- Safety documentation review
- Fire risk assessment review
- Contractor vetting and onsite safety management
- Accident investigations
- Completion of health and safety audits and inspections
- Provision of specific H&S advice to the site teams

In addition to health and safety services, Hamilton Deed were also asked to complete environmental and quality audits across the projects.
